Appendix to report No. GRS2022-115372

This vividly saturated emerald of 2.24 ct is reminiscent in hue of the varieties displaying the legendary colors found in the world-renowned Muzo mines. They are formally described as "Muzo Green" (*) and commonly known in the trade as "Old Mine" emeralds.

This appendix indicates the specific quality and color for emeralds from various Colombian mines; however, it does not specify from which particular mine they were found.

(*) For further information see www.muzo-green.com
